I. Industry Overview

1. Recent EBD Industry Trends
2. Competitive Landscape

Recent EBD Industry Trends

The energy-based device (“EBD”) market is expanding with a 10Y CAGR of 14.3%, driven by an aging population, rising non-surgical procedures, and growing male participation in aesthetics

Expansion of the global aesthetic EBD market

Growth drivers

1 Aging population

Median global age

- An **aging population** is driving higher demand for **aesthetic treatments** as consumers seek to maintain a **youthful appearance**

2 Increasing number of non-surgical procedures globally

Aesthetic market share by technology

50.0% of global aesthetic market are non-invasive⁽¹⁾

- The growing preference for **non-surgical** procedures is expanding the market as patients opt for **safer alternatives** to surgery

3 Growing number of males visiting dermatologists

Global male aesthetics market

FY24
USD
15bn

7Y CAGR of 25.9%

31E
USD
95bn

- Rising male interest** in skincare and aesthetic treatments is expanding the customer base

Competitive Landscape

The energy-based aesthetics device industry is characterized by intense competition among domestic players, with Classsys distinguished as a market leader on account of its robust financial standing

Company Snapshot

Classsys is a South Korean manufacturer of energy-based aesthetic devices, developing a wide range of non-invasive solutions, supported by a diversified product portfolio

Company profile

- Established in 2007, **Classsys is a South Korean manufacturer of energy-based aesthetic devices**, specializing in high-intensity focused ultrasound and radiofrequency
- Listed on **KOSDAQ in 2017**, the company has built a strong portfolio with **flagship products** such as **Ultraformer** (HIFU skin tightening) and **Clatuu Alpha** (fat-freezing)
- In 2022, **Bain Capital acquired a 60.8% stake in Classsys for KRW670bn**, becoming the majority shareholder
- In October 2024, **Classsys fully merged with Illooda**, expanding into lasers and microneedling RF, diversifying its product portfolio
- In May 2025, **Bain Capital executed a partial exit** from its investment in Classsys by selling a **6% stake through a block trade**, raising approximately **KRW228bn**

Shareholding structure⁽¹⁾

Revenue breakdown by region⁽²⁾

Business Overview

Classys' revenue is balanced between devices and consumables, underpinned by a recurring revenue engine, driving sustained profitability

Key products

Recurring revenue engine

Classys' business model is a recurring revenue engine that generates ongoing consumable demand, driving long-term growth

III. Deal Overview

1. Bain Capital's Initial Investment in 2022
2. Value-up Initiatives Deployed by Bain Capital
3. Sales Process of Classsys
4. Bain Capital's Recent Partial Exit

Bain Capital's Initial Investment in 2022

Bain Capital's 2022 investment in Classys marked a control buyout transaction anchored on the company's strong growth potential and scalable global footprint

Transaction overview

Valuation metrics

Share acquisition	39,407,057	
Price per share	KRW17,000	
Acquisition price	KRW670bn	
Multiple ⁽³⁾	Implied equity value	KRW1,101.1bn
	Implied enterprise value	KRW1,094.1bn
	EV/EBIT	21.2x
	EV/EBITDA	20.2x

Execution method

Bain Capital set up BCPE Centur Investments as an investment vehicle to acquire a 60.8% stake in Classys, financing the KRW670bn deal with KRW354.9bn in leverage

Deal rationale

1 Attractive financial position

A scalable model with high margins that supports **strategic bolt-on acquisitions**, which enables **future operating leverage and profitability increase**

2 High growth market exposure

Strong presence in the **rapidly expanding global medical aesthetics market**, driven by increasing demand for non-invasive treatments in, underpins Classys' **premium valuation**

Value-up Initiatives Deployed by Bain Capital

Bain Capital enhanced Classys' value by expanding its portfolio through a strategic merge and accelerating global expansion

Strategic M&A and Portfolio Expansion

Acquisition of Ilooda

Combined differentiated technologies

Complementary **technology integration** strengthened Classys' **market positioning**

Portfolio diversification

Added products

Added key RF devices and specialized lasers from the merge

<Revenue growth after merge>
(USDbn)

Following the Ilooda acquisition, Classys rapidly expanded its RF/laser portfolio, realizing cost synergies

Global Expansion

Expanding beyond borders

01 > FDA approvals

Classys received FDA 510k clearance for Scizer and Volnewmer

02 > Strategic moves

Entered the U.S market in FY24 and established a subsidiary in Japan

<Overseas installed bases⁽¹⁾ & CRS⁽²⁾>

Sales Process of Classys

Bain Capital is actively pursuing a full exit for Classys, having achieved an IRR of 77.4% and 6.6x MOIC, but high valuation expectations continue to make closing a deal challenging

Full exit attempt

- Bain Capital tried to **exit its Classys stake** with Citi and J.P. Morgan as advisors, but **despite outreach** to major buyers like KKR, Carlyle, and Hillhouse Capital, **no deal has been finalized**

Valuation metrics

Target deal value	KRW3,000bn ⁽¹⁾	
% of share	54.2%	
Multiple ⁽¹⁾	Implied EV	KRW5,539bn
	EV/EBIT	38.0x
	EV/EBITDA	35.0x
	P/E	54.8x

IRR & MOIC analysis

Calculation was based on changes in cash due to interest expense, dividends and equity share change⁽²⁾

Total cash inflows		Total cash outflows	
KRW2927.6bn		KRW439.8bn	
IRR	77.6%	MOIC	6.7x

Current status with the sales process

Valuation expectations	vs.	Market reality
Targeting a high valuation with premium multiples built on growth potential and expansion narrative		Buyers view the price tag as excessive, unwilling to pay above peer multiples

The gap between Bain Capital's premium expectations and buyers' willingness to pay has left Classys unsold, resulting in alternative strategies such as recapitalization

Bain Capital's Recent Partial Exit

Bain Capital used refinancing to recapitalize Classsys, and later executed a block deal to secure quicker liquidity

Refinancing

Recapitalization

- Dividend recapitalization**
 - Bain Capital raised debt and paid itself dividends during late 2024 and early 2025
 - Was able to **extract partial returns** before looking for a potential exit
- Exit optimization**
 - By recapitalizing, Classsys looks to be more **financially flexible with increased liquidity**
 - Bain Capital wishes to position the company to **attract buyers**

Block trade

<Market reaction to block trade>

Stock price after block trade (KRWk)

Sharp decline

- Stock price dropped sharply after the block deal

With buyers unwilling to meet premium expectations, Bain Capital turned to a block deal — a pragmatic move to secure liquidity
